Product Description

Massimo T-BOSS 1000 EPS UTV

Built Tough, Works Harder: The UTV That's Got Your Back.

The T-Boss 1000 is built for those who put in the work and expect their tools to do the same.

No-Nonsense Power: Equipped with a 1000cc v-twin means hauling heavy loads and tackling steep climbs without breaking a sweat. 83 horsepower gets the job done.

Built to Last: No fancy frills here, just a rock-solid frame and components designed to take a beating on the job site or out in the backwoods.

Clearance to Conquer: Don't let rough terrain slow you down. 13 inches of ground clearance means you roll over obstacles, not stuck on them.

Haul it All: The dumping cargo bed and 2500-pound towing capacity handle those big loads that other machines may struggle with.

No Worries Recovery: A factory-equipped 4500-pound winch means if you get stuck (and let's be real, everyone does), you're getting yourself out fast.

The Bottom Line: Your UTV is your workhorse, not a show pony. Muscle through the toughest jobs, so you can knock off your list and get back to what matters.
